Polo.

Glen Gilmore - Australian Polo Captain

Designed specifically for the protection of the eyes of Polo and Polocrosse players. Designed with the help of the leading players in Australia & England, these goggles are now worn by leading players throughout the world. The goggles have been tested by the University of New South Wales for impact resistance.

Polo - Wide

Polo - Slim

Features include -

- Impact resistant vented Polycarbonate lens
- Maximum UVA & UVB Protection
- Interchangeable and Replaceable lenses
- Anti-fog coating to lens
- Adjustable clip and elastic strap for comfort & safety
- Unrestricted Peripheral vision
- Soft santoprene rubber frame aerodynamically shaped to provide flexibility & comfort while sealing the eye area from wind, dust and dirt.
- Small circular perforations within the frame to allow air circulation to prevent fogging

Blueye also did in house testing on the goggles using a 12 gauge shotgun. Premium factory loaded Winchester super ranger cartridges containing 4 shot were fired at the goggles from varying distances through a fully choked barrel. Results were as follows;

1: Fired at from 40 metres: Slight indentation of the lens. Frame unmarked.

2: Fired at from 25 metres: Visible indentation of the lens. Slight marking of the frame.

3: Fired at from 15 metres: Lens cracked on impact in the centre only. Frame remained almost unmarked. Even at 15 metres the lens did not shatter and only cracked down the centre.

Sunglasses.
